# Discover The Tri-Zone

Combining durability, strength and lightweight panels with high insulating qualities, ETRUX's Ford E-Transit Temperature controlled van offers an effective mobile solution for a wide range of applications.

Whether for use by food processing companies or food delivery firms, ETRUX's temperature-controlled vehicles are an essential asset to any rental or company fleet.

Using the world renowned GAH fridge unit in combination with high quality insulated panelling, our converted vehicles are tested to IVA N1 standards and offer one of the safest and robust temperature-controlled van solutions on the market.

## Why ETRUX?

ETRUX has developed a new fleet of electric vehicles that are light yet durable and engineered to maximise payload and range.

Working in partnership with companies at the forefront of design and technology we have developed 360° solutions for your zero emissions fleet including electric conversions from 3.5 to 7.5 ton vehicles. Included are specialist trucks with refrigeration units, tail lifts, and other fit out options which balance functionality with performance.
